Who We Are

Interdisciplinary team

- experts in information sciences and mathematics having hands-on experience in university management

From all career levels

- junior researchers (PhD and Postdoc students) and experienced senior researchers

From different Croatian institutions

- University of Zagreb – FOI, University of Split – EF/PMF, University Computing Centre - SRCE, IGH d.o.o., ŠUDIGO Zabok

International partners

- top researchers from the University of Edinburgh and KU Leuven

This work has been supported by the Croatian Science Foundation under the project IP-2014-09-7854.

higher **DECISION**

Development of a methodological framework for strategic decision-making in higher education – a case of open and distance learning implementation

The project research on decision making is structured as a cycle of strategic decision making in four phases

1. Intelligence - problem identification and research, advancement of methodologies such as readiness assessment, diffusion of innovation etc.

2. Design of methodology

- primary research goal is to design a decision making methodology and to improve the multi-criteria decision analysis enabling better strategic decision making in HE

3. Implementation and monitoring

- research and identification of key factors that determine effectiveness of strategic decision, their correlation, design of measuring model for maturity and effectiveness of strategic decision implementation in HE

4. Evaluation - to survey possible approaches and to conduct the evaluation based on the application of J. Pearl's structural causal models

Two basic components of the project

Development of the methodological framework for strategic decision making and monitoring of its implementation

Application, adjustment and evaluation of the methodology on the example of decision implementation on e-learning and distance learning in Croatia

Project Goals

To develop a complete methodology for strategic decision making

To monitor its implementation in Higher Education

Basic Data

Title

Development of a methodological framework for strategic decision making in higher education – a case of open and distance learning implementation

Project number

IP-2014-09-7854

Acronym

higher **DECISION**

Funding body

Croatian Science Foundation (HRZZ)

Duration

4 years
(June 1st 2015– May 31st 2019)
